Commented [AF37]: Start the references list on a new page. The word "References" (or "Reference," if there is only one source) should appear bolded and centered at the top of the page.

Reference entries should follow in alphabetical order. There should be a reference entry for every source cited in the text. All citation entries should be double-spaced. After the first line of each entry, every following line should be indented a half inch (this is called a "hanging indent"). Most word processors do this automatically via a formatting menu; do not use tabs for a hanging indent unless your program absolutely will not create a hanging indent for you.

Commented [AWC38]: Source with two authors.

Commented [AWC39]: Source with organizational author.

Commented [AWC40]: Note that sources in online academic publications like scholarly journals now require DOIs or stable URLs if they are available.

Commented [AWC41]: Example of a book in print.

Commented [AWC42]: When citing a source with up to 20 authors, write every author's name. When citing a source with 21 or more authors, write the first 19 names, an ellipsis, and the final name.
Note that this rule only applies to the reference list and not the associated in-text citations.

Commented [AWC43]: Chapter in an edited collection.

Commented [AWC44]: Academic article for which a DOI was unavailable.

Commented [OWL45]: For the sake of brevity, the rest of the references have been omitted.
